Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 13-23 and 40 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 13-23 and 40 are non-statutory because it can be implemented entirely using software. In paragraph 20 of the instant specification, the Applicant states that circuitry can refer to software. Therefore claim 23, with contains a source map, a destination map, and "circuitry," as specified by Applicant, can be implemented entirely in software, and is therefore non-statutory. Claims 14-23 and 40 depend on claim 13.

Allowable Subject Matter

1. Claims 1-12, 24-39 and 41-42 are allowed.
2. The following is an examiner's statement of reasons for allowance: No prior art of record teaches that for each of a plurality of the source stripes migrated to destination stripes, a separate operation is performed to determine that the source stripe and the destination stripe occupy a same physical location on the storage units and, if so, writing the source stripe to a copy area, and writing the data from the copy area to the destination stripe.
